

Who we are

www.boandiklodge.org.au

Welcome

Boandik Lodge is a community based aged care organisation providing a broad range of services to the aged in the Limestone Coast region of South Australia.

We have been providing services to the aged since 1956 and have a strong commitment to engage with the community and ensure that the range, quantity and quality of services meet the current and future needs of the region.

Our purpose is to partner with clients to enable them to live as they choose.

Our values are to enable people to live as they choose by promoting independence and wellness, providing choice of services, respecting the individual and enabling dignity.

Boandik Lodge is governed by a community based board of directors who give freely of their time to ensure a progressive and innovative organisation.

The board and senior management work cohesively with the common focus of improving the quality of life for every client.

How we can help

Every person is an individual and this is the most important consideration when making a decision about services.

Boandik Lodge is committed to providing individualised care to all clients and offers a wide range of services in a client's home, in independent living units and in residential homes.

We are here to help each individual to live as they choose.

valuing every individual

Community care

The community care services are provided to people living in their homes throughout the Limestone Coast region, there is no area of the region that we do not service.

The services are provided by staff who live in the same area as the client. Staff are selected in consultation with the client, with clients able to choose the time of service delivery.

The services are provided through a variety of programs:

Home support program

This program is the entry level service, designed to provide low levels of support in a client's home or in a group.

Services include:

- Social support
- Domestic assistance
- Personal care and medication
- Transport for shopping and appointments
- Home maintenance
- Physiotherapy and occupational therapy

There are also services available to younger people with a disability through the home and community care program.

Home care packages

The home care package program is designed to support people over the age of 65 who need a higher level of support to live independently in their own homes.

The client has the choice of care and services that they receive based on their individual needs.

A budget is provided that is based on the level of funding available for the package as well as the funds contributed by the client.

Residential care

Boandik Lodge provides residential care across four homes located in Mount Gambier.

The services are individualised based on information provided by the resident and their family and an assessment of care needs.

The aim is for each person to live a meaningful life as they choose, encouraging people to maintain their independence by providing the support they require in their daily living activities.

Residential care homes offer respite (pre-booked and emergency), permanent care and transition care.

Transition care

Transition care is a short term intervention available to people after an acute illness or operation.

The focus is on rehabilitation and support to enable a return to independent living. Transition care is provided in residential facilities and the client's home.

providing the opportunity to live a
meaningful life

Independent living units

As the name would suggest this accommodation is designed for people who can live independently.

There is a variety of accommodation available at the Lake Terrace site in Mount Gambier and the Sutton Court site in Port MacDonnell. Both sites are operated as retirement villages.

The recently constructed units are based on a "unit for life" design that meets the gold level under the *Liveable Housing Design Guidelines*.

The design allows people to age in place in the unit and access community services to support them as their needs change.

Further details of services can be found at the back of this brochure.

Why choose us?

At Boandik Lodge we focus on the individual whether it be a client, representative, staff member or volunteer. The living and working environment is supportive and caring.

We are fortunate to have a dedicated and highly skilled team of staff and volunteers providing care and services to our clients.

We commit resources to ensure that we have up-to-date buildings and equipment that meet the changing needs of clients and that staff are trained in contemporary practice.

Over 50% of the staff have been with Boandik Lodge for more than five years, testimony to the excellent work environment that is provided.

Our dedicated volunteers work with our clients as they choose. The volunteers have a wide range of skills so there will be someone that meets the needs of the individual.

Our volunteers contribute more than 20,000 hours of service annually.

Continuous improvement is at the centre of everything that we do at Boandik. We monitor contemporary practice, look for opportunities for innovation and seek feedback from all stakeholders and the wider community to ensure that our services are meeting the needs of the community.

We are a member of the SA Innovation Hub. This allows us to trial new concepts and work as a community of practice, to ensure innovation in aged care.

Over the years Boandik Lodge has been recognised with awards for achievements in recruitment, retention and training of staff, staff wellbeing, quality care and commitment to the community.

We have achieved excellent results in external accreditation of our residential and community services.

*remain an integral
part of your community*

How much will it cost?

There is no ready reckoner for this. Charges are based on the financial circumstances for each person. Maximum fees are set by the Department of Health. We will work with each person to estimate the fees and accommodation payments.

This is simplified if the person has already completed the required income and asset assessment through the Department of Human Services (Centrelink) or the Department of Veterans Affairs. We can then sit down and talk through what would be best for you and how it will work.
