About us

Boandik Lodge is a community based not-for profit organisation providing quality care for the aged throughout the Limestone Coast region.

We have been providing services to the aged since 1956 and have a strong commitment to engage with the community and ensure that the range and quantity of services meet the current and future needs of the region.

The extensive range of services means that we can adapt to the changing needs of our clients.

Boandik Community Care Providing quality care in your own home

Care at home

We all love our homes and want to keep living there as long as possible. As we get older this may be more of a challenge as those little things like shopping, cleaning, mowing the lawn and caring for ourselves become a bit of a struggle.

These challenges can wear us out and then we don't have the energy to do what we enjoy. We all need a helping hand at times and this is where Boandik Community Care can assist.

How we can help

We will provide a flexible and responsive service that meets your needs. Every person is an individual and is able to choose the services that they need to maintain their independence, wellbeing and connection to the community.

Services are available seven days per week throughout the Limestone Coast region.

Quality is guaranteed

At Boandik Lodge we pride ourselves on providing high quality care and services to all clients.

Our focus is on meeting the needs of the individual.

We achieve this with comprehensive care plans developed by highly skilled case managers, the time spent in matching the staff to the clients and doing all we can to have the same Boandik Community Care staff members delivering the services.

Our recruitment processes ensure that the staff we employ reflect the culture of our organisation and have a strong focus on delivering high quality services.

Staff receive extensive orientation and training to further develop those attributes.

The amount of information provided and the range of choices can be daunting so clients are encouraged to have a representative to support them throughout the process.

Home care packages

Home care packages provide a range of individually tailored services for people who require assistance in their homes.

The client is provided with an individualised budget and is able to choose how they wish to spend the money.

The funds include the subsidy provided for the package and the fees paid by the client.

There are four levels of home care package that are allocated based on the needs of the client - the higher the care needs the more funds available in the clients budget for services.

The Federal Government is the funding body and has developed a recommended fee structure for home care packages.

Boandik Community Care will determine the fees based on individual financial assessments.

Eligibility

To be eligible for services through a home care package, the client will need an approval from the Aged Care Assessment Team (ACAT).

Referrals to ACAT can be made through the My Aged Care website, or by calling My Aged Care on 1800 200 422.
